Finding Aid: Vertical Files

Parks, Gardens & Landscapes: Domestic & International

The Library maintains vertical files on various subjects. These files, transferred from Boston in 2000, to the Society's Library at Elm Bank, contain information on various subjects. The files have recently been consolidated and updated.

The Parks, Gardens & Landscape files are kept in individual file folders, arranged first by geography, then by name. The geographical order is subdivided into domestic and international. Domestic files are then arranged by state or territory. International files are arranged by country.

This Aid is a first step for a researcher. Within these physical files, there are individual folders for each landscape. The content of the files vary widely and may include ephemera, articles, brochures, images and news clippings. If you wish access to the files or further information, please email the Library at library@masshort.org.

Pages 1 and 2 alphabetically list the states and territories in the United States alphabetically for which files exist. An alphabetical list of other countries follows on pages 3 and 4.
